🔗 @ <https://github.com/jungey-sircar>

I'm a Fullstack developer with 2+ years of experience in ReactJS/ReactNative, NextJS and Django, focused on building web applications that are fast, reliable, and easy to use. I enjoy working on practical problems—especially systems that involve complex logic or data—and turning them into clean, user-friendly interfaces.

I've worked with Next.js and have experience building modular applications and integrating them with multiple APIs. I pay close attention to performance and usability, particularly for desktop-based tools where efficiency and responsiveness matter most. Some of the projects I've worked on include [orderflow.shop](#), [nerds.games](#), [erp.sagarmatha.edu.np](#) where I've been involved in developing and improving real-world applications.

I'm comfortable working in team environments, value clear communication, and enjoy continuously learning and improving as a developer.

EXPERIENCE

Contract Developer(Part Time)

kathmandu

Bitcraft Technology

Jan, 2024 - Jan, 2026

React Native, Django, Vue.js, MERN stack/ NEXT.js web app developer

Freelance Web Developer

Indian Client/International Clients

May, 2025 - Present

ML/DL freelancer

Kathmandu

Jan, 2024 - Present

Designed and implemented end-to-end ML/DL pipelines for multiple real-world prediction and classification problems across healthcare, transportation, finance, and social media domains.

Built and optimized supervised learning models for:

- Used Car Price Prediction (regression using feature engineering, outlier handling, and ensemble models)
- Fake News Detection using Transformers
- Real vs Fake User Detection (behavioral feature extraction and anomaly detection) Skin Cancer Detection (CNN-based image classification using transfer learning)
- Applied data preprocessing, feature engineering, and model evaluation techniques (accuracy, precision-recall, ROC-AUC, RMSE)
- Utilized Python, NumPy, Pandas, Scikit-learn, TensorFlow/PyTorch for model development and experimentation.
- Assisted in model selection, hyperparameter tuning, and performance optimization to improve generalization.
- Collaborated with multiple stakeholders to convert problem statements into deployable ML solutions.

+2 Computer Science Teacher(part-time)

Kirtipur

Pushpasadan Boarding Secondary School

Jan, 2024 - Present

- Teach computer science as per NEB syllabus
- Teach Build Your Device (BYD)-based IoT, Robotics, and Coding to high school students
- Guide students in hands-on projects using microcontrollers (Arduino/ESP32)
- Mentor project-based learning in sensor integration, automation, and basic AI applications

+2 computer science teacher

Dharan

Nepal Police School

Jan, 2021 - Jan, 2024

- Taught computer science to students from Grade 9 to Grade 12
- Designed and implemented IoT-based monitoring systems using ESP32 and Arduino at School premises
- Integrated sensor networks for data collection and logging using Blynk and ThingSpeak

Secondary Level Computer science teacher

Kirtipur

Salvinia Academy

Apr, 2024 - Apr, 2026

Taught computer science to grade 9 and 10

EDUCATION

MIT with specializations in AI	Kirtipur
Central Department of Computer Science and Information Technology	Jan, 2024 - Present
<u>Thesis pending</u>	
BICTE	Biratnagar
Purbanchal University	Aug, 2018 - Dec, 2022

ACHIEVEMENTS

Purbanchal University Topper

TRAINING/CERTIFICATIONS

NAAMI AI certification	2024
Nepal Applied Mathematics and Informatics Institute for research	
Took course on machine learning fundamentals from doctorates around the world	
Fusemachines AI fellowship recipient	2025
AI fellowship trainee	

AWARDS

Gold Medalist of Faculty of ICT Education 2022 from Purbanchal University

SKILLS

Basic Deep Learning concepts(Transformer, CNN), Machine Learning fundamentals (Supervised & Unsupervised), Numpy, Pandas, Matplotlib, Data preprocessing & model evaluation, NextJS, MERN, FLUTTER, IOT(BYD approach),ROBOTICS,, AI tools like VEO3, ElevenLabs, HeyGen, Hailuo , Google Flow, HTML, CSS, JavaScript, PHP, MySQL, Python, C/C++ and Java Programming, Django, NodeJS, Tailwind,React

LANGUAGE

Nepali, English
